Novelty (N)	Claims	1-17	YES
	Claims	NONE	NO
Inventive step (IS)	Claims	1-11, 13-17	YES
	Claims	12	NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1 : US 2003/0028892 A1

D2 : JP 10-136314 A

D3 : EP 1076461 A1

D4 : EP 1089565 A2

1. Novelty and Inventive Step

D1 discloses a method and apparatus for providing customers with media contents combined with enhanced, interactively-obtained media contents. D2 relates to an interactive video reproducing device for improving operability in a network standby state by reproducing data corresponding to a reproducing procedure of the specified condition. D3 relates to a process for synchronizing an MPEG decoder for decoding compressed data originating from a recording medium. D4 relates to a transport stream recording/reproducing apparatus and a recording medium for realizing prompt random access reproduction in response to a user's command.

With regard to Claims 1, 6 and 9, the subject matter of these claims is regarded as reproducing an AV data in synchronization with predetermined markup data related to the AV data by receiving location information of video data and calculating a reproduction location of markup data related to the video data.

The subject matter of Claims 11, 16 and 17 is regarded as a recording medium according to Claims 1, 6 and 9.

The subject matter of Claim 12 is regarded as a recording medium having an audio data structure including synchronization information and audio data. But it is obvious to a person skilled in the art to combine D4 with D3 to arrive at Claim 12. Therefore, Claim 12 does not involve an inventive step.
